RELEVANT FACT NEURON BIO

In compliance with the provisions of the MAB circular 9/2010 on information to be provided by the companies in expansion integrated in the MAB, hereby we inform that the Spanish Patents and Trademarks Office (OEPM) grants Neuron Bio the patent "*Neuroprotective, hypocholesterolemic, anti-inflammatory and antiepileptic compound*", published in the Official Bulletin of Industrial Property with number ES2380473B1.

This patent protects a new compound and its derivatives known internally under the code NST0060 as a potential treatment for neurodegenerative ailments, more concretely the Alzheimer's disease. The new compound is as statin with a structure never described before and is the result of the undertaken work by the BioPharma division of Neuron Bio, which continues working with animal models required prior its validation with humans.

Currently the recent granted patent is in proceeding stage in the main industrialized countries thus being the same objective markets for the compound based drug which will be developed in the future.

In Granada, 2 April 2013.

Fernando Valdivieso Amate
Chairman of the Board of Directors
