RELEVANT FACT OF NEURON BIOPHARMA, S.A.

Dear Sirs,

In compliance with the provisions of the MAB circular 9/2010 on information to be provided by the companies in expansion integrated in the MAB, Neuron Biopharma S.A. (hereinafter “NEURON BIO” or the “Company”) hereby informs that:

The United States Patent Office grants Neol Biosolutions (a 50:50 joint venture between Neuron Bio and Repsol) the patent “Biodiesel Production Method” or “Improved procedure for the production of biodiesel” published with number US 8647849B2.

The patent protects the technology MicroBiOil-1® developed by Neol Biosolutions S.A, focused on the production of second generation biodiesel. MicroBiOil-1® is a biotechnological solution with the capacity to revalue crude glycerine, the main by-product of the biodiesel production plants in new oil, transforming it from a waste of little commercial value into a new raw material. An external study carried out by an industrial engineering company has proved the technical and economic viability of the process that increases overall performance of the biodiesel plants.

We remain at your disposal for any clarification you consider appropriate.

Kind regards,

Fernando Valdivieso Amate
Chairman of the Board of Directors
